

# Qlik Sense Developer

In this role you will be a developer of innovative Qlik Sense visual analytic applications. You'll connect customer's data and create advanced web based visual analytic solutions to provide end users with insight to support their day-to-day business decisions.

Your technical and analytical expertise will nurture customers to drive adoption and repeat purchases. The application development lifecycle will encompass a range of skills including interface design, user experience testing, business strategy, web development, data management and analytics.

## KEY RESPONSIBILITIES & TASKS

### Design and develop Qlik Sense applications

- Expert in the features, benefits and application of Qlik Sense
- Develop custom Qlik Sense web application mashups
- Develop bespoke extensions using JavaScript, HTML, and CSS
- Assist in the internal knowledge transfer at QlickiT

### Provide billable professional services to QlickiT customers

- Communicate via phone, email, face-to-face and web meetings with customers assisting and guiding them through the design, development, implementation and deployment process of Qlik Sense applications
- Drive all aspects of successful implementations from requirements and design to support and delivery

### Play an active role in the sales process

- Provide technical support to the sales team
- Analyse customer requirements and develop proposals of technical solutions
- Deliver proof of concept events and demonstrations to potential customers

## KEY CHALLENGES

- Qlik Sense – Learning Qlik Sense and ETL scripting
- Extension Development – Developing extensions using JavaScript, HTML, and CSS
- Consulting – Communicating with clients on implementation and deployment
- Ongoing development of knowledge of the Qlik Platform capabilities and technologies it uses (eg: Qlik Analytics Platform, Qlik Core, Containerisation, Docker, Kubernetes, Bootstrap, Responsive Design)

## QUALIFICATIONS, SKILLS & EXPERIENCE

### Essential

- A self-starter and “problem-solver” mentality
- Previous experience in a consulting background, 2 years minimum.
- Qlik Sense experience
- Relational Database / SQL Literate
- Web Application Development Skills

- Programming expertise using JavaScript, HTML, and CSS
- jQuery and DOM manipulation and debugging experience
- Hands-on experience with relational databases and data modelling
- Experience working in a customer facing role
- Bachelor's degree or equivalent experience
- Business level English
- Full UK Driving Licence

### **Desirable**

- Experience of BI tools and/or enterprise-type (ERP, CRM) applications in addition to installing and managing software running on Windows
- Ability to develop Qlik Extensions, Mashups, Themes & Widgets
- An understanding of business processes
- Experience in UI/UX design
- Source code versioning/control systems, code branching and merging practices
- Experience in REST API programming
- Background in alternative programming technologies (PHP, Ruby, Python, C# .NET, Java, etc.) could be helpful.

### **KEY ATTRIBUTES**

- Comfortable working in Agile / iterative development environments and able to drive the process
- Must be self-managed, responsive, and dedicated to exceptional customer support
- Excellent communication, listening, presentation, and writing skills
- Ability to articulate ideas clearly to both technical and non-technical audiences
- Ability to work well with others in a high-pressure environment
- Aptitude, interest, and self-motivation to continually learn new tools and techniques
- Friendly and professional demeanour with strong interpersonal skills to forge relationships of trust at all levels

*QlickiT is not accepting unsolicited assistance from search firms for this employment opportunity. Please, no phone calls or emails.
